food handling operation at the facility; potentially hazardous foods are prepared hot or cold and held hot or cold for more than 12 hours before serving; potentially hazardous cooked and cooled foods must be reheated; complex preparation of foods or extensive handling of raw ingredients with bare hand contact for ready-to-eat foods occurs as part of the food handling operations at the facility; vacuum packaging, other forms of reduced oxygen packaging, or other special processes that require a Hazard Analysis Critical Control Point (HACCP) plan; or immunocompromised individuals, such as the elderly, young children under age four and pregnant women are served, in a facility in which these individuals compose the majority of the consuming population.
