Dear Planning Committee Members,

Please approve the Glacier Moraine Solar Project! For the reasons outlined on the front of this card, I support this project. But I would add to that list two more benefits -- one individual and one global. (1) As part of a community solar initiative, my rates have decreased 15%. (2) As a Christian, I strongly believe we should care for God's creation, and solar helps us do this.

Sincerely,

Robin L. Murray from Charleston, IL

I second Robin's comments. + Karen Clausing Charleston, IL
