Coles\_Wind\_911\_Addressing\_20250808.zip;

Hi Susan, Hi Kelly -

Attached is a shapefile for 911 addressing at Coles Wind. The shapefile includes 52 points for access to Project facilities off of public roads:

- the O&M Building,
- a permanent met/LiDAR,
- the ADLS radar,
- And 49 entrances to 51 turbine locations (there are two instances where one entrance serves two turbines).

The shapefile includes an attribute to denote which facility the entrance is to.

You previously provided us an address for the Project substation, so it is not included here. Only the Operations and Maintenance Building will receive mail; all other entrances will not have mail service.

Please let me know if you need anything else to establish the addresses.

Sincerely,  
Brie Anderson

BRIE ANDERSON

APEX-WIND-CHECKLIST WITH 911 ADDRESSES.xlsx;

Morning Brie,

I have finished assigning 911 addresses to all 52 points according to the shape file. And have already submitted the first address as it will receive mail. I've attached an excel spreadsheet of the 52 points and added a column for the corresponding address.

Let me know if you need anything else, or have any questions.

**Susan Summers**
